Specialist Swarm

A coordinator-led multi-agent swarm for high-stakes RFP responses.

Harry Potter's Crew · Hackathon Result

What we built in 60 minutes

Coordinator + specialists + skills + critic + evals. The architecture that wins the next \$50M transformation deal.

TL;DR – what changed today

Four specialists moved from *generic Deal Desk roles* to **Acme-RFP-aware operators**; the coordinator got an explicit reconciliation contract; we shipped a new `docx-creation` skill that produces a Gryffindor-branded Word deliverable. Four commits in 90 minutes.

EXISTING SKILLS UPGRADED

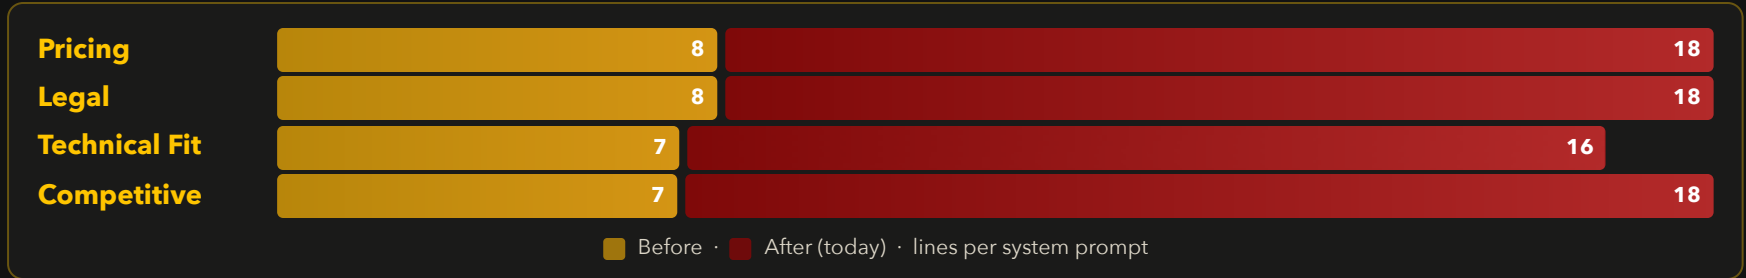

1

NEW SKILL SHIPPED

Four commits across two swim-lanes – Michelle landed the big specialist upgrade at 14:32; Stefan layered the docx skill and a live run after.

Every specialist brief rewritten – and roughly doubled

Pricing · names the four red-flag demands (35%, Net 90, no-escalator, MFN); deal recommendation pill at close.

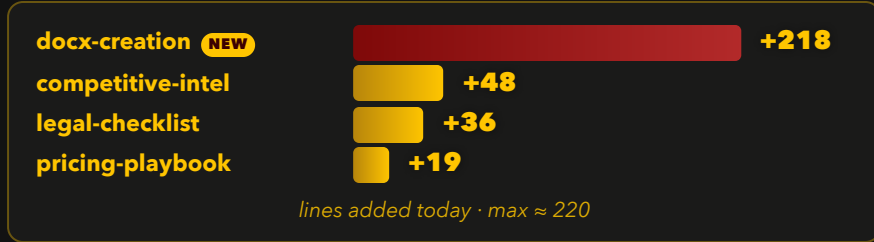

Legal · all 10 categories, `ITEM/Severity/Why/Counter` format, mandatory Aggregate Risk Matrix.

Technical · 5 Acme focal points (80K/s, Power BI, EU residency, 99.99%, 2027 Teradata); weeks-to-prod + weeks-to-migrate.

Competitive · names all 4 competitors; Threat Ranking + win-probability; model `haiku-4-5` → `sonnet-4-6`.

Commit `2ab9c39` · output-section count per brief roughly doubled · every specialist now ends with an explicit final recommendation.

Skill upgrades – and a brand-new docx-creation skill

competitive-intel

New skill: docx-creation **+218 · NEW FOLDER**

- **Attribution:** Harry Potter's Crew → Hogwarts in header, footer, cover
- **Palette:** deep red `#7F0909`, gold `#FFC500`, dark red `#3C0000`, cream `#FFF8E7`
- **Structure:** 9-section skeleton (cover → TOC → exec → ... → appendix)
- **Visuals:** approach diagram, cost breakdown, timeline Gantt – all `matplotlib`
- **Validation:** post-save assertions on footer + ≥ 1 chart + ≥ 1 table

Exercised end-to-end → `hogwarts-proposal-v2.docx` (`cc0d032`)

Coordinator gained an explicit reconciliation contract

Section	Before	After
Eval criteria	Not mentioned	RFP weights inlined: 30% functional · 25% commercial · 20% TCO · 15% timeline · 10% references
Response format		
Bid / no-bid	Implicit	Explicit gate: if 3+ blockers and unlikely to waive – document conditions, <i>don't walk away silently</i>
Conflict reconciliation	"Don't second-guess"	Legal blocker vs. Pricing accept → escalate, don't silently override . Note in synthesis.
Deadline awareness	"deadline is real"	"deadline is 2026-05-26 and we have limited runway"
Output filename	Coordinator.docx	Proposal - <code>BTS-Proposal-AcmeCorp.docx</code>

Net change to `create_coordinator.py`: +92 / -37 lines in the system prompt.

Capability coverage – and 5 net takeaways

	Structured	Acme-aware	Final reco	Block	Conflict

  absent

Net takeaways

1. **Generic → deal-specific.** Specialists name Acme's actual numbers.
2. **Machine-reconcilable.** Risk Matrix, Threat Ranking, deal pills.
3. **Conflict is no longer silent.** Coordinator must escalate.
4. **Branding codified** in the docx-creation skill.
5. **Model upgrade:** Competitive Intel Haiku → Sonnet.

We shipped a grader too – 5 / 8 passed

5 / 8

62%

Pricing Specialist2/2

- ✓ Addresses all four Acme red-flag demands
- ✓ Uses Enterprise tier + discount-band + playbook counter-language

Technical Fit2/2

- ✓ Flags 80K/s, Power BI, 99.99%, Teradata 2027
- ✓ Gives concrete implementation timeline

Legal Reviewer1/2

- ✓ Uses ITEM / Severity / Why / Counter structure
- ✗ Misses some of the 10 checklist categories

Competitive Intel0/2

- ✗ Doesn't cover all four named competitors
- ✗ Skips the required THREAT RANKING block

Each specialist's system prompt run one-shot · graders: `response_contains` + LLM-judge (Haiku 4.5) · `evals/eval_specialists.py`

Coordinator + specialists + skills + critic + evals.

This is the architecture that wins the next \$50M transformation deal.
